

Secondary Programs

Title: Secondary Programs - Placement

The Division supports programs that prepare student placement in postsecondary education, training programs, and full and part-time jobs. Placement for professional-technical students is a shared responsibility of counselors, instructors, and administrators.

Objectives of the placement component of a professional-technical program are to:

1. Assist students in choosing among available post-program opportunities.
2. Teach students how to locate and secure jobs.
3. Help students adjust to new jobs.
4. Serve as student-employer liaison in job-getting/employee recruitment.
5. Inform students about postsecondary education/training programs.
6. Assist students in applying to further education/training programs.
